WINTER FRUIT & NUT TREE LIST 2025

All of our fruit trees for sale at Blueskin are potted during the winter period & available in July. They are hand pruned and potted into our own 'special' compost potting mix. This contains our compost and Osmocote slow release fertiliser to ensure the tree will establish into a healthy specimen in its first season. **Numbers are limited for some varieties**; we suggest you order as soon as possible. If there is a variety you are looking for which is not on the list we will try to source it for you.

Apples

APPLE ADORE	A crisp and juicy mid-season apple; fruit stores well for 2-3 months. Heavy cropping and black spot resistant.
APPLE AUTENTO DWARF	Early season variety with red blush over green skin. Crisp and tasty when eaten fresh and flavour improves with fridge storage. Good disease resistance. Self fertile, naturally grows to 3m in "Christmas tree" habit. (PVR)
APPLE BALLERINA BOLERO	A dwarf apple that has attractive pink tinged, white spring blossom followed by shiny green, early season ripening, fruit, with white juicy flesh. P.V.R.
APPLE BALLERINA FLAMENCO	This columnar growing tree has attractive white tinged pink blossom, followed by shiny bright red mid season eating apples. Perfect for small spaces and patios.
APPLE BALLERINA POLKA	Stunning column shaped tree with attractive white spring blossoms. Bright red-green mid season eating apples of excellent flavour. Ideal for a container. PVR
APPLE BALLERINA WALTZ	Columnar shaped tree with pink and white blossom in spring. Late season ripening, red apple with sweet juicy flavour. Ideal for container planting or in garden where space is limited. (PVR)
APPLE BRAEBURN	One of the best eating apples on the market. Sweet and tangy, very crisp, juicy and firm. Striped red blush over green skin. Late season. A good keeper.
APPLE BRAMLEY	(Old English type) A sharp and fruity variety, high in Vitamin C. Green to yellow skin and large, flat round shape. Turns golden and fluffy when cooked. Heavy cropper. Stores well. Mid to late season.
APPLE COX'S ORANGE PIPPIN	Rich, aromatic, nutty flavoured flesh make this older variety still very popular. Red stripes on green skin when ripe. Ripens early season. Best on fertile soil with good drainage.
APPLE FUJI	A firm but very juicy dessert apple. Reddish skin with pink stripe and white flesh. Late maturing. Good keeper.

APPLE GOLDEN DELICIOUS	Mild sweet flavour and juicy crisp ,light yellow flesh. Golden-yellow skin when ripe. Old favourite which can be eaten raw or cooked.
APPLE GRANNY SMITH	A late, large sized dessert apple. White flesh which is crisp and juicy ,with distinctive flavour.Heavy and regular cropper on upright ,vigorous tree.Self thinning.
APPLE GRANNY SMITH ESPALIERED	
APPLE GREENMEADOWS COX	Early season apple with green/yellow skin and bright red stripes. Sharp tangy flavour.
APPLE HETLINA	Reliable crops of medium sized, crisp red fruit that have good eating qualities. Early season. Disease resistant tree. Has very high levels of anti-oxidants and other beneficial compounds.
APPLE INITIAL	An early, large, red Gala type apple with high resistance to disease. Excellent flavour, high aroma, low acid & high sugar. Highly recommended for home gardeners & organic orchardists. PVR.
APPLE KIDDS ORANGE	Medium to large crisp fruit with yellow skin, red blush and stripes.Reliable cropper and good keeper.Ripens mid season.
APPLE LIBERTY	Highly recommended disease resistant variety producing medium sized ,high quality fruit with yellow skin and red blush.Flesh is white,crisp, juicy and sweet.
APPLE MONTYS SURPRISE SEMI DWARF	Late ripening ,large apple with red blush over green skin.Crisp for eating but also cooks well.Very high levels of antioxidants and flavonoids which may inhibit growth of cancer cells.
APPLE PACIFIC ROSE	A cross of Gala and Splendour. A unique rose- pink skin colour, medium to large with a rich, sweet flavour, and crisp juicy flesh. Exceptional appearance and storage capability. PVR
APPLE PEASGOOD NONSUCH	The best of all cooking apples. Very large, round golden yellow apple with a red flush and stripes. Flesh is tender with a pleasant flavour. Mid season.
APPLE ROYAL GALA	Very Crisp apple with white flesh and red skin. Sweet. Early maturing and good keeper.
APPLE STURMER	Late season, medium sized eating and cooking. Green with russet blush skin .This is one of the best all round apples and is an excellent keeper.
APPLE WANDIN GLORY 1.7M STD	WEeping APPLE. A fine weeping tree, with masses of white blossom in spring followed by a crop of large, highly coloured & sweet edible fruit. Fruits Jan - Feb.
APPLE WORCESTER PERMAIN	Heritage apple. Mid season ripening .Bright red over green skin, sweet , excellent flavour and crisp white flesh. Crops heavily and reliably.Hardy.
APPLE double graft ROYAL GALA & BRAEBURN	Royal Gala: Late ripening, large apple with red blush over green skin. Crisp for eating but also cooks well. Braeburn: Sweet and tangy, very crisp, juicy and firm. Striped red blush over green skin. Late season. A good keeper.

Apricots

APRICOT APRIGOLD	Dwarf apricot with single pink flower and green foliage. Full sized, early season fruit which are highly coloured and have a tangy flavour.
------------------	---

APRICOT CLUTHAGOLD	Large fruit with real apricot flavour. Has an orange skin with slight red blush. This is a great eating experience! Ripens late January.
APRICOT CLUTHALATE	Medium sized orange fruit with sweet juicy flesh. Late season and self-fertile. Requires winter chilling, good drainage and plenty of sun. PVR
APRICOT GARDEN ANNIE	Showy pale pink flowers in spring . Medium to large fruit has bright yellow skin, is semi-clingstone juicy and firm. Self fertile, ideal for smaller garden or in container.
APRICOT MOORPARK	Large fruit with real apricot flavour. Has an orange skin with slight red blush. This is a great eating experience! Ripens late January.
APRICOT TOMCOT	Very large fruit with strong red blush over orange skin. High quality, freestone fruit with intense apricot flavour. Compact tree with masses of pink blossom in spring. Self fertile.
APRICOT TREVATT	Good sweet flavour with juicy, firm, orange flesh. Pale yellow skin. Med to large fruit. Can be eaten fresh, dried, jammed or preserved. Ripens early season.

Avocado Trees

AVOCADO REED	Fruits are large and round and ripen green. Will usually bear fruit 3-5 years after planting. Mulch and keep watered. Needs protection from frosts and wind. DO NOT DISTURB ROOTS WHEN PLANTING. Evergreen Ht.5m

Berries & Currants

ARONIA MELANOCARPA	(Northern Highbush) Vigorous, upright shrub, known for huge crops of large berries mid-season. Tolerates spring frosts. Pollinate with another Highbush variety such as Reka, Muffin, Duke, Nui
BLUEBERRY BLUECROP	(Northern Highbush) Vigorous, upright shrub, known for huge crops of large berries mid-season. Tolerates spring frosts. Pollinate with another Highbush variety such as Reka, Muffin, Duke, Nui
BLUEBERRY BLUE JOY	(Northern Highbush) Early season variety with medium size, mild flavoured berries. Prefers acidic soils. Best planted with Bluecrop, Dixie, Duke or other Northern Highbush variety.
BLUEBERRY BRIGITTA	Northern Highbush variety. Large, mid season fruit with a tasty flavour and a firm skin. Pollinate with any other 'Northern Highbush' blueberry. Likes acidic soil in sunny spot.
BLUEBERRY DIXIE	(Northern Highbush) Large, fragrant berries with rich, tangy-sweet flavour, ripening from mid-Jan to February. Pollinate with another Highbush variety.
BLUEBERRY DUKE	(Northern Highbush) Early ripening with good crops of mildly sweet-flavoured berries. Requires acid soil, summer moisture and sun. .Pollinate with other Northern Highbush variety such as Blue Crop, Blue Jay or Dixie.
BLUEBERRY MUFFIN	Plant in well drained soil rich in organic matter. Mulch well to ensure moisture for shallow root systems. Feed with slow release fertiliser low in calcium early spring & mid summer. Self fertile. PVR
BLUEBERRY NUI	(Northern Highbush) Very large, light-blue berries. Excellent keeping variety. Prefers full sun and acidic soils. Best planted with Bluecrop, Blue Joy, Dixie or Duke.
BLUEBERRY REKA	(Northern Highbush hybrid) Dark blue, medium sized berries with a sweet flavour, ripening before Christmas. Good autumn colour. Pollinate with other Highbush variety such as Blue Crop, Muffin, Nui, Duke.

BLUEBERRY SIERRA	(Northern High Bush) Bigger than average, full flavoured, early to mid-season fruiting variety. Prefers sunny, moist, acid soils. Pollinate with other Northern Highbush variety such as Reka, Spartan, Duke or Nui.
BLUEBERRY SPARTAN	(Northern Highbush) Small white flowers, followed by large good-flavoured, blue-black berries in mid to late summer. Prefers sunny, moist acid soils. Pollinate with other Northern Highbush variety such as Reka, Sierra, Duke, Nui.
BLUEBERRY TIFBLUE	(Rabbiteye) Heavy crops of highly flavoured, light blue berries late in season. Requires another rabbiteye variety to cross pollinate like Blue Magic, Sapphire Blue or Burst. Prefers Sunny, well-drained, acidic soils.
BLUEBERRY TWIN PACK NUI/BRIGGITA	Northern High Bush Blueberry twin pack- Nui and Brigitta
BLUEBERRY TWIN PACK REKA/DUKE	Northern High Bush Blueberry twin pack- Reka and Duke
BLUEBERRY TWIN PACK REKA/SIERRA	Northern High Bush Blueberry twin pack-Reka and Sierra
BLUEBERRY TWIN PACK REKA /SPARTAN	Northern High Bush Blueberry twin pack- Reka and Spartan
BRAMBLE BERRY DELIGHT	(Boysenberry x Loganberry) Thornless vigorous climber which produces delicious, large dark red fruit in December/January.Heavy cropper.Very hardy and self fertile
BRAMBLE BLACKBERRY BLACK SATIN	A very vigorous hybrid thornfree blackberry, flowering and cropping early in the season. Moderately sized, soft, juicy black fruit with a tangy flavour. Slightly dull when fully ripe.
BRAMBLE BOYSENBERRY MAPUA	A mostly spineless berry, cropping well in late season. Large berries easily harvested. Some fully thorny canes will grow from below ground and should be cut off as low as possible. Prefers full sun, fertile soil and well watered while fruit ripens.
BRAMBLE BOYSENBERRY TASMAN	Mostly spineless canes with medium to large berry size cropping well and easily harvested. Ripens in December and is delicious to eat.
BRAMBLE BOYSENBERRY THORNLESS JEWEL	A boysenberry cross. Large, firm, conical, rich dark red/black berries. Old fashioned boysenberry flavour, juicy and sweet. Self fertile. Early-mid season fruiting.
BRAMBLE LOGANBERRY WAIMATE	A vigorous thornless loganberry with large fruit size and high yields. Long, conical, dusky red fruit with good flavour, ripening from mid summer. Excellent fresh or for processing.
CURRENT BEN ARD	Large, firm, low-acidic berries ripening from late December to February.Prefers Full sun. Plant in well drained soil.
CURRENT BLACK MAGNUS	Early fruiting. Sweet, medium sized berry. Prefers deep fertile soil with adequate drainage. Fruit mainly on new seasons wood. Self fertile but will increase yield if planted 2 or more.
CURRENT BLACK SEFTON	Vigorous upright growing blackcurrant with large sized berries ripening in December. Sweeter than traditional black currant; ideal for preserving. Prefers sunny and well drained soil. PVR
CURRENT MURRAYS RED	A vigorous upright bush with large bright red glossy fruit. An abundance of fruit ripening December/January. Red currants fruit on 2 year and older wood. When pruning take out weak branches and old wood that has fruited.
GOOSEBERRY INVICTA	A vigorous spreading bush with large pale fruit. Resistant to powdery mildew. Plant in well drained soil with plenty of organic material.

GOOSEBERRY PAX	Mildew resistant variety with good sized fruit, which ripens red.Plant in well drained soil with plenty of organic material.Don' let these dry out in summer
MORUS ALBA PENDULA 1.7M STD	(Weeping White Mulberry) A very striking small weeping tree with closely packed pendula branches. Pale green flowers in late spring followed by sweet edible fruit which are green-white ripening purple. Hardy.
MORUS ALBA PENDULA 1.5M STD	(Weeping White Mulberry) A very striking small weeping tree with closely packed pendula branches. Pale green flowers in late spring followed by sweet edible fruit which are green-white ripening purple. Hardy.
MORUS NIGRA SEEDLING	(Black Mulberry) Dark almost black-red fruits are very tasty . Hardy,wide-spreading tree, which when mature becomes gnarled and picturesque. Very long-lived tree.
RASPBERRY ASPIRING	This variety crops twice, once in early summer and again in autumn. It has large, dark red, conical fruit with excellent flavour on vigorous canes with few spines. P.V.R.
RASPBERRY EBONY	Spineless canes with rosettes of berries that turn a dark, rich purple-black when ripe, and have a sweet, delicate flavour. Best in rich, fertile, well-drained soil.
RASPBERRY HERITAGE	Small to medium sized berries borne in large quantities from March to May. Fruits on new wood. Plant in well drained, fertile soil.
RASPBERRY IVORY	Golden yellow raspberries with a delicious, sweet flavour are produced from December to April. Best in rich, fertile soil. Mulch in summer and prune old canes in winter.
RASPBERRY TULAMEEN	A mid-season, summer fruiting variety producing good yields of firm red fruit. Fruit are easy to remove, are large to very large and have excellent flavour and shelf life.
RASPBERRY WAI AU	Mid season variety with very large, fruit that are conical in shape and remain firm when ripe.Very tasty. Repeat fruits in autumn. Best grown in compost rich soil that are moist but well drained.Very hardy.
RUBUS PENTALOBUS	(Orangeberry) Dramatic, fast-growing ground cover related to the strawberry. Delicate white flowers in Spring followed by bright orange fruit for Xmas. Partly self fertile,but better with strawberries or raspberries nearby.Trim after fruiting. Very hardy.
UGNI MOLINAE	(NZ Cranberry, Chilean Guava) A slow growing small sized bush with aromatic leaves. Flowers are waxy pink bells. Fruits are edible tasty mahogany-red berries.
UGNI MOLINAE SUNGOLD	(Variegated Chilean Cranberry) Vibrant golden-bronze tinted young growth.Small white-tinted pink flowers followed by round reddish edible fruit.Hardy.Full sun or part shade.Lime free soil.
WORCESTERBERRY	(Blackcurrant x Gooseberry) Vigorous bush with dark purplish fruit which appear in summer. Berries can be eaten raw or cooked. Their flavour is between a gooseberry and a blackcurrant. Mildew resistant and very hardy.

Citrus Fruit

GRAPEFRUIT GOLDEN SPECIAL	Thick skinned, high quality fruit. Medium to large size with good juicy flavour.
KUMQUAT MEIWA	Shiny, thin skinned fruit about 2cm across with tart and distinctive flavour. Good for marmalade. Highly ornamental shrub. One of the hardiest citrus. Prefers a prominent sunny position.

LEMON GENOA	This true lemon produces good size, near seedless, juicy fruit with the main crop in summer. Taste is very tangy. Bushy and near thornless. Needs warm sunny spot and protection from frost.
LEMON LEMONADE	Novelty citrus hybrid.. Crops of lemon shaped medium sized fruit , slightly sweeter than lemon. Juicy, mild flavour.Prefers good drainage , regular feeding and warm sunny position. Needs protection from frost.
LEMON MEYER	Hardy tree which produces large sweet fruit at an early age. Requires good drainage and warm sheltered position. Keep well watered and feed regularly.Avoid deep cultivation.Protect from heavy frost.
LEMON MEYER DWARF	Dwarf Grafted on dwarf rootstock) produces large sweet fruit at an early age. Requires good drainage and warm sheltered position. Keep well watered and feed regularly.Avoid deep cultivation.Protect from heavy frost.
CITRUS LEMON VILLAFRANCA	Glossy variegated foliage produces yellow and lime green fruit in the summer months. Mostly thornless. Plant in moist well drained soil. Water regularly when fruit is forming. Protect from frost.
LEMON YEN BEN	Lisbon type lemon with thin skin. This is a prolific bearer . Fruit are juicy. Good variety for home gardener as smaller growing and hardy . Will need warm sunny position and protection from frost .
LEMON YUZU	Rare Japanese citron lemon. Sought after for it's unique sour,tart flavour of zest and juice. More cold hardy than most citrus. Forms attractive small, spiny tree. Requires full sun , good drainage and regular feeding.
LIME BEARSS	This improved selection of Tahitian Lime produces small, thin-skinned, almost seedless fruit. Needs a warm, sheltered, frost free site and well drained ,fertile soil. Ideal container plant .
LIME FINGER LIME	Small, thorny, with tiny leaves this plant produces finger like fruit which contain pearl like sacs which are tart and juicy, sometimes known as Citrus Caviar. Prefers full sun and protection from frost.
LIME KAFFIR	The rind and leaves of this variety are popular in Asian cooking although the bumpy-skinned fruit is inedible. Must have a warm, sunny site with frost protection in the winter.
LIME TAHITIAN	Small to medium sized fruit with deep green skin turning yellow when ripe. Flesh juicy and tangy and relatively seedless. Excellent for refreshing drinks.
CITRUS MANDARIN KAWANO	(Satsuma Type) Medium sized tree bearing heavy crops of sweet and juicy ,easy to peel fruit. Ripens in winter. Needs full sun and warm sheltered position, with moist but well drained soil. Protect from frost.
CITRUS MANDARIN MIHO	An improved selection of the 'easy peel' satsuma mandarin, bearing crops of large, rounded, flat-shaped fruit. A juicy, mild flavoured fruit. Prefers warm sunny position. Protect from heavy frost.
CITRUS MANDARIN OKITSU	Seedless, large fruiting variety. Fruit has easy peel 'baggy' skin and easy to separate segments. Fruit gets full colour once fully ripe. Protect from frost, needs a sunny site.
CITRUS MANDARIN SATSUMA	The original selection of the seedless. Easy peel with a thin leathery skin. Fruiting in late Autumn. Prefers full sun with moist but well drained soil. Protect from heavy frost.
CITRUS ORANGE CARTERS NAVEL	Renowned for its juicy and sweetly flavoured fruit. Ripen in winter and are virtually seedless, easy to peel, and finely textured. Protect from frost. Needs a warm sunny position.
CITRUS ORANGE FUKUMOTU	Navel orange with large round fruit with a strong red tinge to the rind. Sweet tasting, ripens in late winter. Quite a compact grower. Plant in the sunny spot in well drained fertile soil and protect from frost.

CITRUS ORANGE HARWOOD LATE	Average sized, very juicy fruit with a rich flavour. Ripens from November to March. Protect from frost. Needs a warm sunny position.
CITRUS ORANGE VALENCIA	Closely related to Orange Harwood's Late, Valencia has a sweet flavour and very few seeds. Ripens February to October. Prefers full sun, well drained soil, regular feeding during the fruiting season and adequate water. Protect from frosts.
CITRUS ORANGE WASHINGTON NAVEL	Seedless variety. The fruit are tender, juicy, and full of flavour which make it a favourite for citrus lovers. Medium large, firm, juicy, sweet fruit. Easy to peel. Needs a sunny spot and protection from frost
CITRUS X LIMONIA LIME RANGPUR	Fruit looks like a mandarin orange, not a true lime. Highly acidic a good substitute for limes. Use for marmalade, cocktails, guacamole etc. Full sun, well drained fertile soil. Protect from heavy frost.

Cherries

CHERRY COMPACT STELLA	Large, dark red cherry in huge clusters. Flesh firm, good home garden variety. Ripens around Christmas. Self fertile.
CHERRY DAWSON	Old favourite. Large dark red skinned, dark fleshed cherry, maturing mid to late December. Upright habit. Can be pollinated by Stella or Bing.
CHERRY GRIOTELLA	New tart cherry with compact habit . Delightful spring blooms followed by bounty of bright red cherries. Very high health fruit with many culinary uses. Great for large pots and small gardens. Very hardy. PVR
CHERRY LAPINS	Large, sweet, dark red, firm fruit maturing in early January. Excellent flavour. Self fertile and crack resistant. Very reliable.
CHERRY MONTMORENCY (SOUR)	An Amorelle-type sour cherry with bright red skin, white flesh and clear juice. Great for pies and preserves. High in antioxidants. A disease resistant, compact, spreading tree. Self-Fertile
CHERRY STELLA	Large, sweet dark red fruit. Prolific and regular bearer. Great pollinator. Mid-season. Forms a large tree but can be espaliered and trained to shape and size. Self Fertile.
CHERRY TANGSHE	Fruiting cherry with self fertile pale pink blossom. Fruit are a pale pink with red cheek and good flavour. Early ripening , about Christmas time. Self fertile.

Chestnut

CHESTNUT no. 1005	Vigorous early and consistent cropper. Early harvest.
-------------------	---

Feijoas

FEIJOA APOLLO	Large fruit with excellent flavour early in season. Requires another variety for cross-pollination. Hardy. Suitable for edible hedge.
FEIJOA BAMBINA	Attractive evergreen bush. Fruits from April onwards. Petite fruit with smooth green skin. Eat skin and all. Pollinated by birds and best to plant more than one. PVR

FEIJOA DEN'S CHOICE	A plant of good growth habit that fruits mid-season with large sweet fruit. A good variety for eating. This variety is drought tolerant. Best planted with another variety for better pollination, such as Apollo or Kakapo.
FEIJOA KAITERI	Very early season variety with exceptionally sweet, tasty and large fruit. Partly self fertile but best planted with other variety. Feijoas have attractive foliage and striking red flowers in summer. Hardy. Needs hot summer for good fruit. PVR
FEIJOA KAKARIKI	An exceptionally early variety, with very sweet and large fruit. Named after Maori word for green. For best fruiting, plant another early fruiting variety such as Kaiteri, Anatoki or Apollo. PVR
FEIJOA SHERBERT	Early fruiting variety with very large fruit, white flesh and sweet tangy flavour. Vigorous growth habit and more tolerant of drought and wind than other varieties. Pollinated by Unique or other early variety.
FEIJOA SWAN	Mid-season, large round 10-12cm white flesh sweet and fragrant. Vigorous open growth habit, drought tolerant once established. Partially self fertile but better with another mid season such as Den's Choice.
FEIJOA TAKAKA	Self fertile, but better planted with more than one. Produces large tropical flavoured fruit early in the season. PVR.
FEIJOA UNIQUE	A small tree which produces lots of large fruit early season .Self-fertile and useful as pollinator. Best to plant more than one bush.Hardy. Can be grown as a hedge.
FEIJOA WIKI TU	A dwarf, easily managed tree with huge fruit of firm texture mid to late season. A good keeping variety. Partly self fertile, but better if you plant with another variety. PVR

Figs

FIG BROWN TURKEY	A rich flavoured fig of large size, brown skin and pink flesh. Long oval shape. Will bear two crops a year in early summer and autumn.
FIG MRS WILLIAMS	Strong growing tree which crops well. Fruits have yellowish- green stain, with rich red flesh. Requires hot dry conditions.
FIG SWEET BLACK	A vigorous, highly ornamental tree that also provides delicious sweet fruit; fruit ripens around March. Requires a sunny, sheltered spot, protected from wind and frost.

Grapes

GRAPE ALBANY SURPRISE	Reliable outdoor variety. Heavy cropper of large, juicy and aromatic fruit with bluish-black skin . Vigorous. Disease resistant. Mid-season ripening. Suitable for wine production.
GRAPE CANADICE	Medium sized bunches of red-black seedless grapes, with excellent delicate flavour. Good disease resistance and winter hardiness. Early ripening.
GRAPE NIAGARA	Sweet juicy white grapes with a tangy flavour. Vigorous with large clusters of fruit in mid season.
GRAPE ROBINSON	(Hamburg Type) Black outdoor table grape raised in Palmerston North. Ripens well and fruits twice in warmer climates.

GRAPE SCHUYLER	Large, early fruiting, sweet, dessert grape, with jet black skin. Regular and heavy cropper of medium sized fruit which are produced in long clusters on vigorous vines. Plant in full sun and feed regularly. Suitable for outdoors.
----------------	---

Hazelnuts

CORYLUS AVELLANA BARCELONA	Hardy, vigorous hazelnut tree with a large nut, flowering mid-season. Pollinate with Alexandra or Merveille de Bolwillier.
CORYLUS AVELLANA MERVEILLE DE BOLWILLIER	A hardy vigorous hazelnut, cropping in late autumn. Useful tree, ideal for hedging or specimen planting. Delicious nuts and an excellent pollinator.
CORYLUS AVELLANA TONDA ROMANO	Produces good crops of small-medium sized nuts with excellent flavour. Pollinators: Barcelona, Merveille de Bowillier, Tonda di Giffoni
CORYLUS AVELLANA WHITEHEART	(Hazelnut) Large bushy shrub which makes a good hedge. A selected form with nuts of excellent flavour for eating, roasting, cooking or stuffing. Pollinators Alexandra, Merveille de Bolwillier.

Hops

HUMULUS LUPULUS SMOOTH CONE	(Hop Vine) Ex commercial NZ bred hop with striking female flowers in autumn. Great as an ornamental, for brewing and for floral arrangements. Requires sun and summer water. Needs to be trained over arch or supported. Hardy.
-----------------------------	---

Nectarine

NECTARINE FANTASIA	A late fruiting nectarine with very attractive yellow/red blushed skin and yellow flesh. Freestone with a lovely flavour. Spray regularly with copper spray in spring to control peach curl.
NECTARINE GOLDMINE	Medium sized, mid season, white fleshed with red over green skin colour. Dessert quality with sweet melting flavour. Vigorous and upright tree. Self fertile.
NECTARINE MABEL	Unique dark purple foliage tinged with green. Delicious sweet purple-skinned fruit. Ripening mid season and is quite hardy to diseases. Self fertile. PVR
NECTARINE SNOW QUEEN	The "classic" old fashioned Delicious creamy, white fleshed fruit with deep red skin. Fruits mid January. Tasty. Freestone. Self fertile

Olives

OLIVE ASCOLARNO	Attractive tree. Fruits in the Autumn, Medium sized, high quality, table olives. Good for preserving with good oil content.
OLIVE EL GRECO	Compact tree grown for reliable cropping. Medium sized fruit good for pickling. Good oil content. Fruits at 5 years. A first rate landscape tree.

OLIVE EUROPEA J5	Produce a heavy crop of good sized fruit. Good for pickling or oil.
OLIVE FRANTOIO	One of best of Tuscan oils. The olives are smallish and ripen late in season. Vigorous growing, hardy. Self-fertile, but better pollinated with Leccino or Picholene. Pickles well when green.
OLIVE KORONEKI	A very hardy primary oil cultivar from Greece. An early cropper. Well suited to coastal areas. Ideal for hedging or screening. Self-fertile.
OLIVE LECCINO	A great Tuscan variety producing good low-acid oil. One of the most frost hardy cultivars. Vigorous. Cross pollinate with Picual, Pendolino or Frantoio.
OLIVE MANZANILLA	One of the world's most popular table olives. Small spreading tree. Medium sized fruit used both for oil and table. Pollinate with Barnea or Frantoio. Protect from hard frosts.
OLIVE PICUAL	Spanish variety. Early producing with high oil content. Salt tolerant variety. Hardy to cold. Compact bushy growth. Self-fertile.

Peach

PEACH APRIL WHITE	Delicious white firm fleshed large peach with pink blush. Tree is medium vigur and resistant to leaf curl. Heavy crop late in season. Spray regularly in spring with copper to prevent peach curl.
PEACH BLACK BOY (Peach Sanguine)	A late peach with purplish/red flesh and furry purple skin. Late season. Suitable for eating fresh when ripe and preserving. Reliable cropper and resistant to peach curl.
PEACH BONANZA 60CM STD	Yellow freestone peach with red blush. Large, sweet fruit, low in acid, with a mild, refreshing flavour. Highly attractive in both blossom and fruit.
PEACHCOT	Cross between apricot and peach. Golden late season fruit that are very sweet and tasty with firm texture. Regular cropper. Self fertile. Spray regularly in spring to prevent peach curl.
PEACH FLATTO SWEET BONNET	New peach variety with a flat shape making it virtually unsquashable in lunch boxes. Produces large crops of sweet, tasty, yellow-fleshed fruit in early-mid February. Self fertile. PVR
PEACH GOLDEN QUEEN	Late season yellow fleshed clingstone peach. Old favourite for preserving. Regular cropper.
PEACH GARDEN LADY 70CM STD	Good crop of full-size, yellow fleshed peaches. Freestone. Prefers full sun, good soil, and protection of blossom from spring frosts. Best planted by other peach or nectarine. Spray regularly in spring with copper to prevent peach curl.
PEACH ROSE CHIFFON 50CM STD	(Dwarf) Tasty, juicy, white fleshed freestone peach. Excellent ornamental fruiting selection tree with double deep rose coloured flowers. Early fruiting.
PEACH SWEET PERFECTION	New leaf curl resistant selection found by Helen Brookes near Duntroon. Abundance of red skinned, freestone, yellow fleshed ,juicy fruit. Resistant to browning. Great flavour and good for preserving. PVR
PEACHARINE HEALEYS	Cross between peach and nectarine. Beautiful tasting with golden crunchy flesh with a red blush. Fruits late January. Regular cropper. Pray with copper in spring to prevent peach curl.

Pears

PEAR BEURRE BOSC	A mid to late pear with a long shape and brown skin. Good flavour. Heavy cropping. Partly self-fertile but pollination helped by Conference, Taylors Gold, Winter Nelis.
PEAR CONFERENCE	Green skin with some russetting. Sweet and juicy. Ripens February to March. Upright shape, regular, heavy bearer. Self-fertile.
PEAR DOYENNE DU COMICE	A delicious, large mid-season pear. Dessert type, skin green/yellow with a brown blush. Suggested pollinators Bon Chretien or Winter Nelis.
PEAR GARDEN BELLE	Only true dwarf pear variety. White spring blossom, glossy summer foliage and good autumn tones. Delicious, sweet flavoured fruit with smooth flesh texture and green and slight russetted skin. Ripens mid summer. Partially Self fertile.
PEAR NASHI HOSUI	Apple shaped fruit in late February. Adaptable to both cold and warm climate. Prefers a well drained soil. Prune well in winter. Pollinate with Kosui, Nijiseiki or Shin Seike.
PEAR NASHI NIJISEIKI	Large apple-shaped Asian pear with smooth yellow-green skin. Moderately sweet, juicy flesh. Mid season fruiting. Partially self fertile but better with another variety.
PEAR PACKHAMS TRIUMPH	Medium to large fruit with green-yellow skin with red blush and sweet juicy flesh. Heavy cropper and good keeper. Suitable for dessert or preserving. Pollinators are Beurre Bosc Bon Chretien, Conference.
PEAR RED BARTLETT	Dessert or bottling pear. Early ripening with wine-red blush. Partly self-fertile. Suggested pollinators, Conference, Winter Nellis.
PEAR SECKEL	Smaller growing gourmet pear. Small-medium fruit, with exceptional flavour and creamy white juicy flesh. Ideal for home gardens Mid season. Partially self fertile Pollination assisted by Packhams, Nashi or Winter Nelis.
PEAR TAYLORS GOLD	Fully russetted brown skin. Buttery, succulent fruit, which is large and juicy. Ripens late season. Pollinate with Beurre Bosc, Conference, Packham's Triumph. PVR
PEAR WILLIAM BON CHRETIEN	Large, early variety with white, firm but juicy flesh and pale green skin which turns yellow when ripe. Best picked green. Suitable for cooking, preserving or fresh eating. Pollinated by Beurre Bosc, Winter Nelis, Conference or Doyenne du Comice.
PEAR WINTER COLE	Late medium sized dessert pear. Rich flavour. Good keeper. Suggested pollinators, Conference, Winter Nelis, or William Bon Chretien.
PEAR WINTER NELIS	Good eating pear with light russet skin. Late season ripening and good keeper. Pollinate with Conference or William bon Chretien.

MULTI GRAFTED PEAR TREES

PEAR DOUBLE GRAFT DOYENNE DU COMICE/ BEURRE BOSC	Two varieties on one plant. Ideal for small gardens or just for something different. One variety pollinates the other.
PEAR DOUBLE GRAFT DOYENNE DU COMICE/ WINTER NELIS	Two varieties on one plant. Ideal for small gardens or just for something different. One variety pollinates the other.

PEAR DOUBLE GRAFT
CONFERENCE /
DOYENNE DU COMICE

Two varieties on one plant. Ideal for small gardens or just for something different. One variety pollinates the other.

PEAR DOUBLE GRAFT
WINTER NELIS/WILLIAM
BON CHRETIEN

Two varieties on one plant. Ideal for small gardens or just for something different. One variety pollinates the other.

Pecans

COLBY

Vigorous strong growing tree producing quality nuts Pollinated by Hirschi,Giles or Peruque.Deep rooted tree.Suitable for colder regions. Needs shelter from cold winds.

HIRSCHI

Vigorous strong growing tree producing quality nuts.Pollinated by Colby.Hirschi.or Peruque.Deep rooted tree.Suitable for colder regions .Needs shelter from cold winds.

Plums

PLUM BILLINGTON

Medium sized plum with dark red flesh and skin. Good dessert and jam plum. Pollinators : Black Doris, Omega, Wilsons Early.

PLUM BLACK DORIS

A popular early, large plum with dark red flesh and black skinned fruit. Vigorous and upright tree. Pollinator Elephant Heart, Billington or Santa Rosa. Good for eating fresh or cooking.

PLUM BURBANK

Large, round, dark red fruit with sweet, juicy, aromatic yellow flesh. Crops regularly and heavily. Mid-season. Partially self-fertile, but better with other plums.

PLUM COES GOLDEN
DROP

Large oval yellow plum with good flavour and juicy flesh. Mid-season ripening.Pollinated by Greengage, Damson ,Reine Claude du Bavay or Prune

PLUM DAMSON

English plum with small oval fruit. Greenish yellow flesh and blue black skin. Ripens late January.Traditional jam and sauce plum. Self fertile.

PLUM DUFF'S EARLY
JEWEL

Red skin over yellow flesh. Heavy cropper. Ripens late December- January. Self-fertile and good pollinator for other plums .

PLUM ELEPHANT HEART

Very large, mid-season, red fleshed plum with red skin. Good dessert plum. Upright and vigorous tree. Pollinators Burbank and Omega.

PLUM FORTUNE

Large, round-conical, bright red fruit ripening late January/ February. Juicy, firm yellow flesh. Freestone when fully ripe. Pollinated by Santa Rosa or Billington.

PLUM GREENGAGE
ENGLISH

Round yellowish-green fruit with rich tender flesh. Late season. Recommended pollinators- Coes Golden Drop, Angelina Burdett.

PLUM GREENGAGE
REINE-CLAUDE DU
BAVAY

Heavy cropping, succulent, green fruit with sweet yellow flesh and distinctive greengage flavour. European greengage type. Self fertile. Ideal for bottling or dessert.

PLUM HAWERA	Large dark red fruit with very firm dark, blood red flesh and excellent flavour. Heavy cropper. Ripens January. Good for fresh eating or preserving. Self-fertile.
PLUM LUISA	Very large plum with yellow flesh and skin and virtually freestone. Exceptional eating quality, very juicy. Ripens late January early February. Hardy to all diseases. Self-Fertile. Protected by PVR.
PLUM OMEGA	Late season, large, red fleshed, sweet, free-stone plum. Deep red-speckled green skin. Good eating and preserving. Partially self-fertile. Better with pollinator such as Santa Rosa, Duffs Early Jewel or Billingtons.
PLUM PRUNE ITALIAN	Dark purple skin with light amber flesh that turns red when cooked. Freestone with rich flavour and sweet flesh. Eat fresh, dried or bottled. Cold-hardy tree. Self Fertile.
PLUM PRUNE STANLEY	Large sweet yellow-fleshed prune-plum with purple skin. Self-fertile and good pollinator for others. Heavy cropper. Late season.
PLUM SANTA ROSA	Large dessert plum with yellow tinged pink, sweet flesh. Ripens January- February. Partly self fertile, but better pollination with Duffs Early Jewel or Omega.
PLUM SATSUMA	Medium sized plum with mottled dark red skin and very dark red flesh which is firm, and juicy sweet with slight tang and rich flavour. Heavy cropper. Suitable for fresh fruit, jam or stewing. Freestone. Suggested pollinator Santa Rosa.
PRUNUS SPINOSA (SLOE PLUM)	Large dense shrub with dark spiny branches. Small white flowers in early spring. Fruits, like small damson plums are blue then shining black. Used to flavour gin, wine or preserves. Very hardy.
PLUM VICTORIA	UK's favourite plum. Produces heavy crops of egg-shaped plums with yellow flesh and red or mottled skin. Excellent for dessert, bottling, cooking or jam. Grows into wide-spreading tree, magnificent in flower. Self-fertile. Mid season.

Pomegranate

PUNICA GRANATUM EVERSWEET	(Pomegranate) A deciduous shrub with glossy leaves and large orange/red flowers in summer. Red skin fruit which give sweet clear juice, virtually seedless ripen in Autumn.
PUNICA GRANATUM WONDERFUL	(Pomegranate) Good ornamental fruiting tree for lawns and borders. Fruit are large, glossy, purplish red with crimson juicy flesh.

Quince

QUINCE SMYRNA	A vigorous tree with unusually large leaves. Very large fruit with smooth pale yellow skin. Mild, tender flesh, sweet when cooked. Keeps well. Self fertile.
QUINCE van DIEMAN	A small tree grown for its white rose-like flowers and large, yellow-orange, aromatic fruit with spicy flavour and 'furry skin'. Early ripening. Heavy bearing and hardier than most quinces. Self fertile.
